

# **DISINFECTION AND SANITAZING MISTING SYSTEMS**

*Portable and fixed engineering solutions*

# PORTABLE DISINFECTION SYSTEMS

Euspray has different portable fogging disinfection systems that guarantees complete disinfection and sterilization of different surfaces and areas. All our portable systems, can be used to disinfect and sanitize public transport, such as trains, planes, buses, airports, stations, schools, offices, etc.

## ADVANTAGES

- 01 Fast and safe disinfection
- 02 Hygienic operation
- 03 Automatic system
- 04 Portable wheeled system
- 05 More effective than manual cleaning

## RHCONTROL TOP

### KEY POINTS

- Droplet size 5-30  $\mu\text{m}$
- Liquid level indicator
- 180° rotative spray gun
- 40L pressurized tank
- Control unit

### REQUIRES

- Electricity supply (220V/50Hz)
- Compressed air supply

### OPTIONAL

- Integrated compressor

## RHCONTROL BASIC

### KEY POINTS

- Droplet size 5-30  $\mu\text{m}$
- Liquid level indicator
- 180° rotative spray gun
- 20L pressurized tank
- Control unit
- Economical and lightweight version

### REQUIRES

- Electricity supply (220V/50Hz)
- Compressed air supply

# PORTABLE DISINFECTION SYSTEMS

## RHCONTROL MANUAL

### KEY POINTS

- Droplet size 5-30  $\mu\text{m}$
- Liquid level indicator
- Spray gun with anti-drip system
- 20L pressurized tank
- Extendible telescopic rod (2 meters)

### REQUIRES

- Compressed air supply

### OPTIONAL

- Portable compressor

## RHSANI

### KEY POINTS

- Droplet size 5-30  $\mu\text{m}$
- 2x E1 atomizer
- 10L pressurized tank
- Liquid level indicator
- Pressure regulator
- Economical and lightweight version

### REQUIRES

- Compressed air supply

### OPTIONAL

- 24L pressurized tank
- Portable compressor

# PORTABLE DISINFECTION SYSTEMS

## EU-SANEX

### KEY POINTS

- Compact and lightweight
- 5L pressurized tank
- Integrated compressor
- 10m electric cable and spray gun with 9m cable

### REQUIRES

- Electricity supply (220V/50Hz)

## EU-SANITIZER

### KEY POINTS

- Motorized model
- 110L pressurized tank
- 6,5h autonomous battery
- 1.30m surface coverage
- Controllable through the mobile app

### REQUIRES

- None

### OPTIONAL

- Lateral spraying

## FIXED DISINFECTION SYSTEMS

Euspray also has a fixed misting disinfection system for different areas or spaces, such as large surfaces, hypermarkets, stations, airports, schools, large workspaces in the public or private sector, etc. These fixed disinfection systems, are designed to have little or no maintenance. The installation of such a system offers everyone maximum protection against viruses and diseases in daily lives.

### ADVANTAGES

- 01 Reduced maintenance
- 02 Disinfection of surfaces and areas without wetting them
- 03 Fully automated
- 04 A customized system adapted to specific needs

## BALLMIST

### KEY POINTS

- Droplet size 5-7,5  $\mu\text{m}$  onwards
- Compact and economical option
- 1-4 air mist atomizers
- Easy installation

### REQUIRES

- Compressed air supply
- Liquid supply

### OPTIONAL

- Pressurized tank for liquid supply
- Portable compressor

# FIXED DISINFECTION SYSTEMS

## EU-TUNNEL BASIC

### KEY POINTS

- Remarkably fine droplet size 5-30 micron
- More efficient disinfection thanks to its pneumatics atomizers (E1)
- 50% less disinfectant consumption
- Built-in wheels for easy mobility
- Disinfect 2.500 people a day
- Not wetting (neither the clothes nor the floor)

### INCLUDED

- 20 Lt. pressurized tank with level indicator
- Integrated compressor
- Photocell for starting and switching off
- Traffic light for on/off spray time

### REQUIRES

- Electricity supply (220V/50Hz)

### OPTIONAL

- Electronic hydroalcoholic gel dispenser
- Anti-slip mat
- UV-C lamp
- Thermographic camera
- Light and sound warning signal
- Human voice for instructions
- Exterior lighting
- Interior Lighting

**Applus**<sup>+</sup>

# FIXED DISINFECTION SYSTEMS

## EU-TUNNEL TOP

### KEY POINTS

- Remarkably fine droplet size 5-30 micron
- More efficient disinfection thanks to its pneumatics atomizers (E1)
- 50% less disinfectant consumption
- Built-in wheels for easy mobility
- Disinfect 2.500 people a day
- Not wetting (neither the clothes nor the floor)

### INCLUDED

- 20 L pressurized tank with level indicator
- Integrated compressor
- Photocell for starting and switching off
- Traffic light for on/off spray time
- Electronic hydroalcoholic gel dispenser
- Anti-slip mat
- UV-C lamp
- Thermographic camera
- Light and sound warning signal
- Human voice for instructions
- Exterior lighting
- Interior Lighting

### REQUIRES

- Electricity supply (220V/50Hz)

**Applus**<sup>+</sup>

# FIXED DISINFECTION SYSTEMS

## EU-SPLIT

### KEY POINTS

- Fine droplet size less than 30 micron
- More efficient disinfection thanks to its pneumatics atomizers (E1)
- 50% less disinfectant consumption
- Disinfect 450 people a day
- Not wetting (neither the clothes nor the floor)

### INCLUDED

- 3 Lt. pressurized tank with level indicator
- Integrated compressor
- Photocell for starting and switching off

### OPTIONAL

- Electronic hydroalcoholic gel dispenser

### REQUIRES

- Electricity supply (220V/50Hz)

**Applus**<sup>+</sup>

# FIXED DISINFECTION SYSTEMS

## RHCONTROL 180°

### KEY POINTS

- Droplet size 5-30  $\mu\text{m}$
- 180° rotative spray gun
- Control unit

### REQUIRES

- Electricity supply (220V/50Hz)
- Compressed air supply
- Liquid supply

### OPTIONAL

- Pressurized tank for liquid supply
- Portable compressor

## RHCONTROL 360°

### KEY POINTS

- Droplet size 5-30  $\mu\text{m}$
- 360° rotative spray gun
- Control unit

### REQUIRES

- Electricity supply (220V/50Hz)
- Compressed air supply
- Liquid supply

### OPTIONAL

- Pressurized tank for liquid supply
- Portable compressor

# DISINFECTION ACCESSORIES

## PNEUMATIC ATOMIZERS

### ULTRASONIC ATOMIZER

#### KEY POINTS

- Extremely fine droplet size 5-20 µm
- Long spray and coverage
- Great option for create disinfection tunnel

#### REQUIRES

- Compressed air supply
- Liquid supply

## E1

#### KEY POINTS

- Extremely fine droplet size 5-30 µm
- Compact and economical option
- Easy installation
- Great option for create disinfection tunnel

#### REQUIRES

- Compressed air supply
- Liquid supply

# DISINFECTION ACCESSORIES

## HYDRAULIC ATOMIZERS

### A

#### KEY POINTS

- Fine droplet size 10-30  $\mu\text{m}$
- Compact and economical option
- Does not need compressed air to operate
- Great option for create disinfection tunnel

#### REQUIRES

- Liquid supply

### CX

#### KEY POINTS

- Fine droplet size 15-40  $\mu\text{m}$
- Compact and economical option
- Easy installation
- It's possible to add an anti-drip filter
- Great option for create disinfection tunnel

#### REQUIRES

- Liquid supply

### MX

#### KEY POINTS

- Fine droplet size 15-40  $\mu\text{m}$
- Compact and economical option
- Easy installation
- Great option for create disinfection tunnel
- It's possible to add a filter

#### REQUIRES

- Liquid supply

# DISINFECTION ACCESSORIES

## HYDRAULIC NOZZLES (FLAT JET)

### MC2

#### KEY POINTS

- Fine droplet size 20-50  $\mu\text{m}$
- Great option for create disinfection tunnel
- Economical
- Does not need compressed air to operate
- Can operate with low pressure
- It's possible to add a filter

#### REQUIRES

- Liquid supply

### C1

#### KEY POINTS

- Fine droplet size 20-50  $\mu\text{m}$
- Great option for create disinfection tunnel
- Economical
- Does not need compressed air to operate
- Can operate with low pressure
- It's possible to add an anti-drip filter

#### REQUIRES

- Liquid supply

## PRESSURIZED TANK

#### KEY POINTS

- Great option for spraying disinfectants
- Quick-connection for spraying accessories
- Three different sizes: 5L, 9L, and 18L

#### OPTIONAL

- Available model with wheels, level indicator, and spray lancet
- 50L pressurized tank

Australia - Austria - Chile - France - Italy - Poland - Russia - South Africa - Spain - UK - US
